

Dr. Warren Washington

*Climate science trailblazer
(1936 - present)*

Anh Mai, St. Olaf College 2023

General Information

Dr. Warren Washington is a highly respected atmospheric and climate scientist, specializing in computer models tracing back to the 1960s. His models paved the way for predicting atmospheric patterns that heavily influence the climate science field we know today.

Associated Organizations

National Center of Atmospheric Research
National Academy of Engineering
American Philosophical Society
American Meteorological Society (former president)
US Global Change Research Program (current chair)

Scientific Contributions

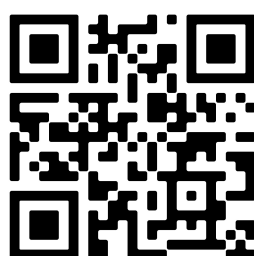

Parallel Climate Models
Community Earth System
Introduction to Three-Dimensional Climate Change (1986)

Awards

Dr. Charles Anderson Award (1999)
Vollum Award (2004)
Nobel Peace Prize (2007)
National Medal of Science (2009)
National of Medal of Science (2010)
Tyler Prize for Environmental Achievement (2019)
