

 ST. OLAF PHYSICS DEPARTMENT

COLLOQUIUM SERIES

HOW TO GROW A SCIENCE COMMUNITY

Heather Michalak

Director of the Little Shop of Physics, a hands-on informal science education and outreach program at Colorado State University in Fort Collins.

Wednesday, May 10

3:00-4:00PM

RNS 210 or Zoom

Effective and impactful science outreach and engagement cannot exist without addressing community needs.

In their talk, "How to Grow a Science Community," they will break down how LSOP builds, maintains, and nurtures relationships with community partners from Fort Collins, the Oglala Lakota Nation in Pine Ridge, SD, and the Southern Ute Nation in Ignacio, CO. Finally, because LSOP believes science belongs in your hands, they will finish their open forum with two interactive demos and a Q&A session. For more details about LSOP, check out our website: <https://www.lsop.colostate.edu/>
